

NEW Prep Tools for LMR® Cables

All CST prep tools are rugged and lightweight and provide a consistently sharp cut of the dielectric for best VSWR performance.

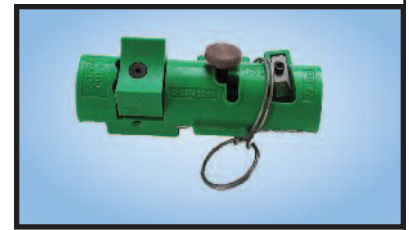

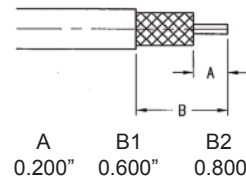

CST-195-200 (3192-102)

- Combination feature allows preparation of LMR-195 and LMR-200 cables for either straight or right angle connector attachments
- Suitable for use with most LMR-195 and 200 connectors
- Requires use of separate debur tool (DBT-U)

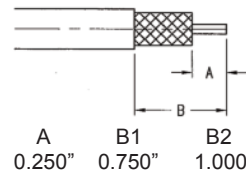

CST-240A (3192-152)

- Combination feature allows preparation of LMR-240 cables for either straight or right angle crimp connector attachments
- Suitable for use with most LMR-240 connectors
- Requires use of separate debur tool (DBT-U)

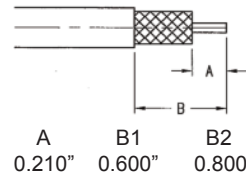

CST-300 (3192-084)

- Combination feature allows preparation of LMR-300 cables for either straight or right angle connector attachments
- Suitable for use with most LMR-300 connectors
- Requires use of separate debur tool (DBT-U)

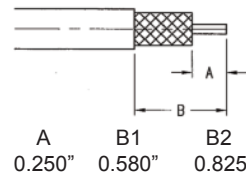

CST-400 (3192-004)

- Combination feature allows preparation of LMR-400 cables for either crimp or clamp connector attachments
- Suitable for use with virtually all LMR 400 connectors
- Includes a built-in debur tool eliminating the need for a separate debur tool

CST-500 (3192-075)

- Combination feature allows preparation of LMR-500 cables for either crimp or clamp connector attachments
- Suitable for use with most LMR-500 connectors
- Includes a built-in debur tool eliminating the need for a separate debur tool

CST-600 (3192-052)

- Combination feature allows preparation of LMR-600 cables for either crimp or clamp connector attachments
- Suitable for use with all LMR-600 connectors
- Includes a built-in debur tool eliminating the need for a separate debur tool
